

## **Wallet Extra Credit:**

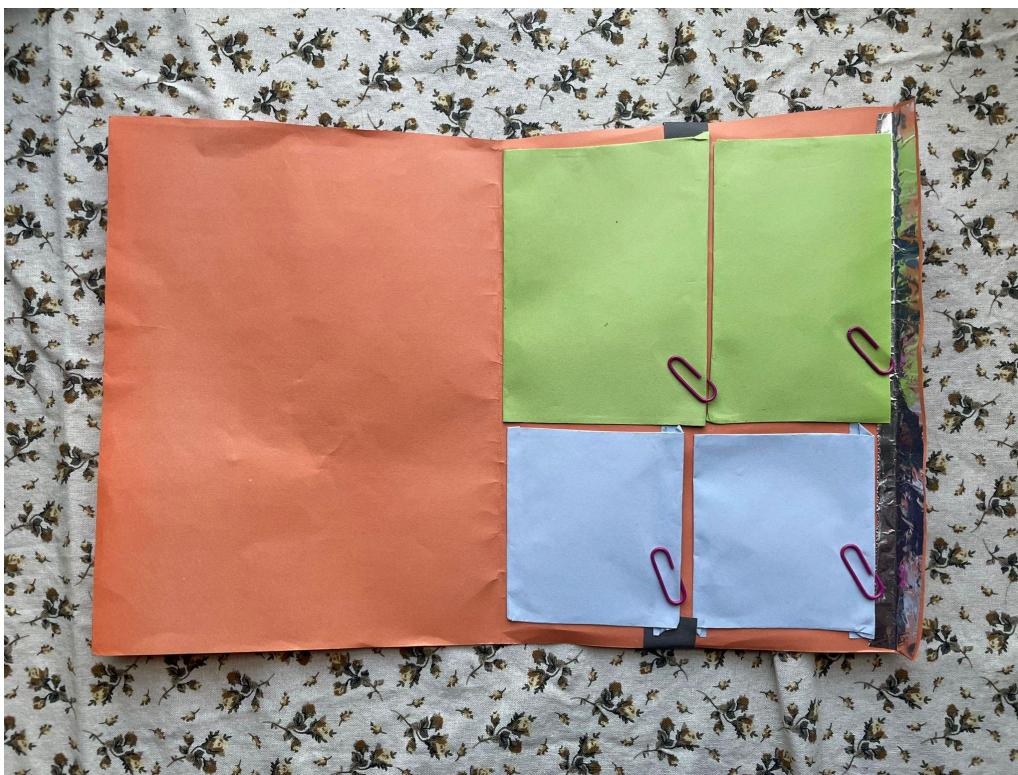

The wallet was designed based on the Client's requirement, but this is more like a Prototype of the actual model. It has to be noted that the Wallet desired by the client replicates more like a mini-purse and an all-in-one product.

The design Layout is provided for the proposed and desired Wallet;

### **Outside the Wallet:**

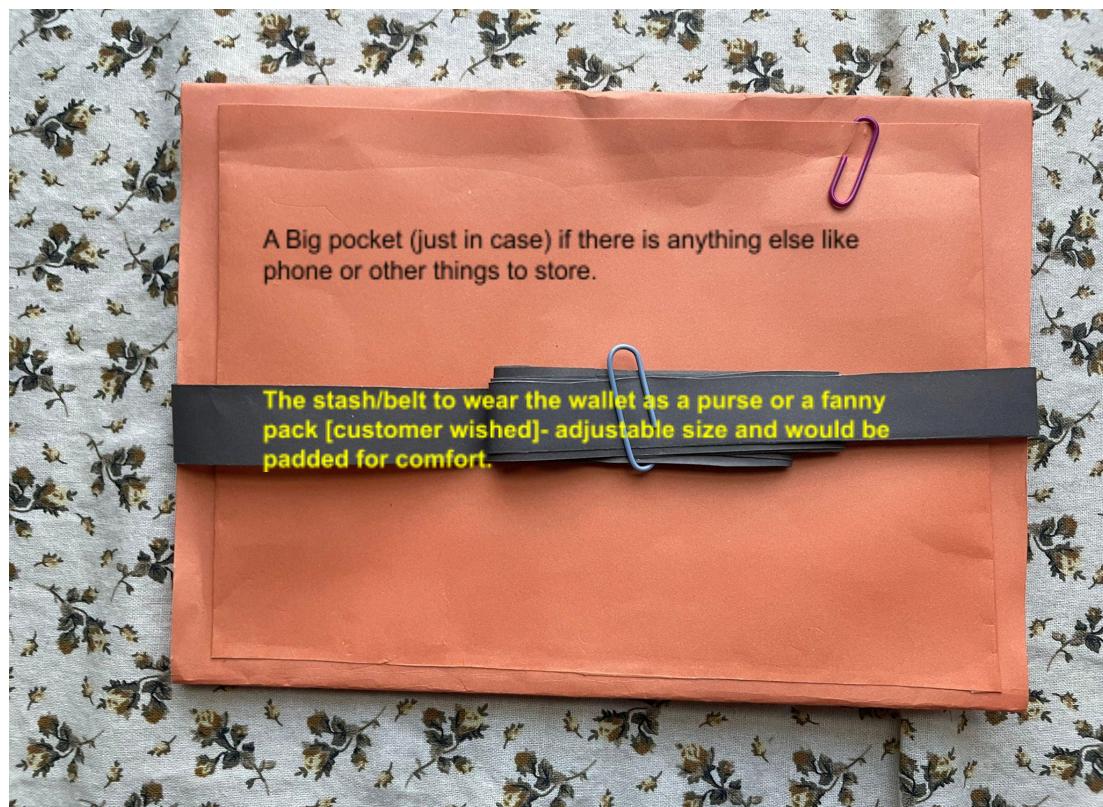

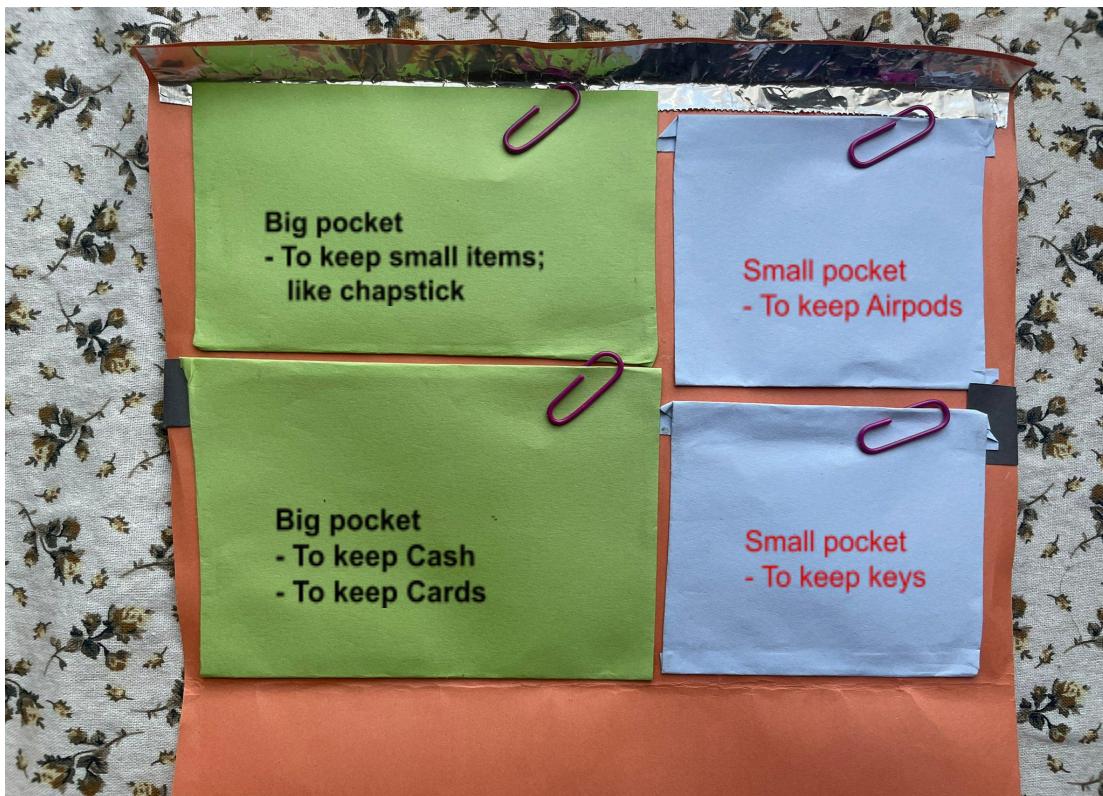

### **Inside the Wallet:**

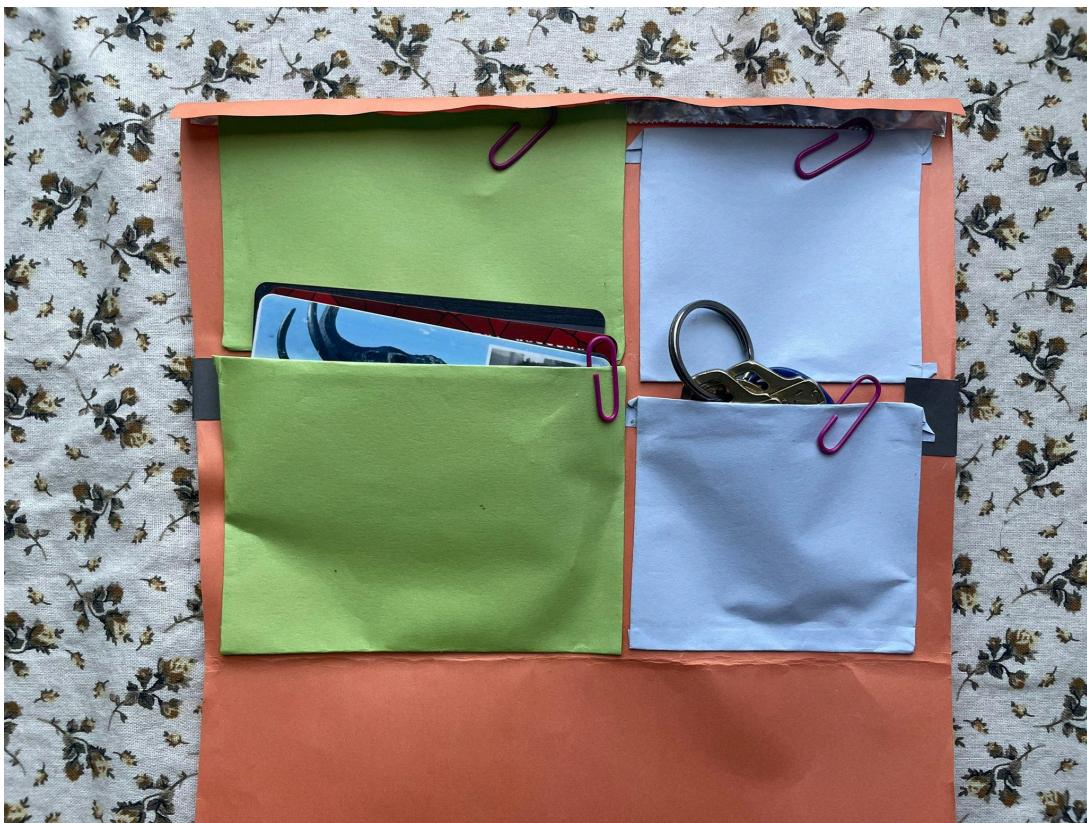

The breakdown of things the Client wished in more depth;

**Design Layout [with description of how it was designed]**

**Demonstration:**
